Political and Social Conditions of Latinos, A Bibliography

A collection of essays describing the Latino family structure and its effect on women.

Examines the impact and trends in Latino participation in American politics as a part of The Spectrum Series Race and Ethnicity in National and Global politics.

This chapter concerns race relations with Mexican Americans.

Profiles of the men and women and organizations that ignited efforts to achieve "first-class citizenship" for Mexican immigrants.

A history of the development of political power from earliest times when the first Latino elected delegate to the U.S. Congress was Joseph Marion Hernandez in 1819. In the 21st century this diverse group is beginning to become a political power.

Contrasting views from experts, policy makers and concerned citizens followed by a bibliography of books and periodicals.

In 2006, foreign-born workers accounted for 15% of the U.S. labor force and this white paper contends that more workers means more total economic output.

Studies of the adaptation patterns and trajectories of second generation Mexican-Americans, based on the Children of Immigrants Longitudinal Study done in the ’90s.

Provides overviews of the following topics. The Hispanic-American experience: demographics and beyond -- Hispanic Americans and the immigration debate -- The growing political clout of Hispanic Americans -- Cultural and economic influence -- Education and the bilingual debate.
Includes a transcript and complete testimony of a presentation by San Diego immigration advocacy group representatives regarding the civil and human rights consequences of U.S. border policy along the Southwest frontier with Mexico.

Written by 4 Mexican American scholars and activists who have collected important court cases, federal and state laws that have affected Mexican Americans and other Latino groups.
